

## “Up-The-Coax” Hand-Held Programmer with Lens Control

The inMotion inUTC-ZF is an optional iCCTV™ compliant product to enable advanced programming of inMotion cameras. The hand-held programmer is connected via a simple Male / Female loop through BNC cable that is inserted in series with the video signal from the camera, to a monitor or control device. Once connected and activated, the programmer sends a telemetry signal back along the coax to enable and navigate around the On-Screen-Display menus of the connected inMotion camera.

In addition, it provides control of Zoom and Focus motors and enables Push to Focus features on Motorised Lens Control (MLC) equipped cameras.

This simplifies both commissioning and servicing of cameras, as physical access is not required to the camera to make adjustments to the configuration of the camera. This makes this a very valuable tool in modern installations where access to cameras may be limited.

Examples of installation environments where this product can really simplify the engineer’s tasks are:

- Retail - Shop Floors, Entrances, Cash Offices, High Ceilings
- Banking - ATM Machines, Safes, Foyers.
- Transport - Toll Booths, Entrance Barriers, Ticket Machines, Tunnels.
- High Security - Custody Suites, Prisons.

User Interface	5 way Joystick + Power LED
Cable Length	1.3m
Battery type	Lithium Button Cell - CR2025
Dimensions (controller)	85mm x 50mm
